

Oracle Solutions

ORACLE Migration Experts

As an Oracle Partner, Imex Systems Inc. has Oracle Certified Professionals on staff with the skills and expertise to deliver added benefits to those organizations using Oracle technology and applications. Our Oracle upgrade and migration solutions help transform legacy applications into modernized, user-friendly solutions that are responsive to current and future business demands. Our proven track record and the ability to understand business as well as technology makes us a valuable partner for your Oracle projects.

Our organization consists of well trained, highly skilled and experienced project managers, analysts, architects, designers and programmers. Based on our extensive experience with government and private sector projects, we have developed a proven methodology for upgrading and modernizing custom applications based on Oracle Forms and Reports as well as earlier versions of E-Business Suite and other applications. We use automated tools to reduce project time and cost, eliminate errors associated with manual processes and greatly improve the overall quality of work.

We provide a comprehensive range of services for Oracle customers including:

Applications

- Forms and Reports, E-Business suite Migration, Upgrades and Enhancements
- Application Development and Maintenance

Database

- Data Migration
- Design and Modelling
- Database Upgrade, Maintenance, Administration and Performance Tuning
- Remote Database Administration Services

Re-Engineering

Our re-engineering service enables customers take full advantage of enhanced functionality and features available in the latest Oracle platforms including wireless/mobile services.

Benefits

- Leverage investments in Oracle technology
- Enable to meet current and future business demands
- Avoid obsolescence and de-support
- Modernize your applications to take full advantage of the internet
- Reduce total cost of ownership
- Cut project delivery time by more than 50%
- Highest quality professional services

Migrate to Oracle 9i/10g versions or to Oracle Java/ADF or to pure Java/J2EE.
